Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/534,109	Applicant(s) SMEETS ET AL.	
	Examiner C. J. Arbes	Art Unit 3729	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claims 11-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claims contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In the instant Amendment Applicants recite *inter alia*...while the 1st element moves in a predetermined direction at a desired position moving the 2nd element relative to the 1st element in a direction opposite to the predetermined direction to cause the 2nd element to be stationary relative to the desired position. It is not understood and the specification does not explain how this step (in said 11) is carried out. For example there is no disclosure as to what means or by what method the 1st and 2nd elements move. There is no disclosure of how the 1st and 2nd elements are interrelated or even if these elements are interrelated. Applicants are merely providing a mental scheme and are not adequately informing a PHOSITA s to what elements are needed and how these element are interconnected in order to make or use this alleged invention work. The Office fails to understand by what means this language is carried out.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 11-17, assuming that the specification is enabling, are further rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

For substantially the same reasons as advanced above the claims are held not to particularly point out nor distinctly claim the invention. For example if the 2nd element (say 13 for argument's sake) is stationary relative to a desired position and the 1st element, (say 7, for

Art Unit: 3729

argument's sake)) and the 1st element is moving in a predetermined direction, how is the 2nd element moving in a direction opposite that of the 1st element's direction. The 2nd element cannot be stationary and be moving at the same time. Applicants' claims are held to be unclear, vague and indefinite.
